Children 

WHERE HOPE & OPPORTUNITIES MEET

**ANNUAL
REVIEW**

2022

From the Founders...

Wow – on January 3rd 2013, Right4Children (R4C) received its formal registration as a non-profit social organization in Nepal, and now we are celebrating 10 years of dedicated service to 33,310 children and young people.

Our vision & mission of supporting vulnerable children to reach their potential and live their lives to the full has remained the same throughout. Our dream of assisting children to develop themselves from early childhood to leading independent sustainable livelihoods has been very successful. This has been down to our teams developing innovative, low-cost, but high-impact programmes working hand-in-hand with the beneficiaries and stakeholders. Parents, communities, local authorities and policy-makers have all been involved in the process, and we believe that this has been our main recipe for success for our target groups to thrive, seeing long-lasting impact & change!

Our core philosophy at R4C of giving back through the 3 Ws, the 3 ways anyone, anywhere can give back – through **Wisdom, Work, Wealth**, remains our guiding force and principal. To be able to follow One's passion, working together with inspiring, and motivated beneficiaries, team members, volunteers, supporters and partners, who have become friends, is nothing less than a privilege and highly fulfilling.

Thank you all so much for all the dedication, love, and support you have shown. And for the next 10 years all we can say is – BRING IT ON!

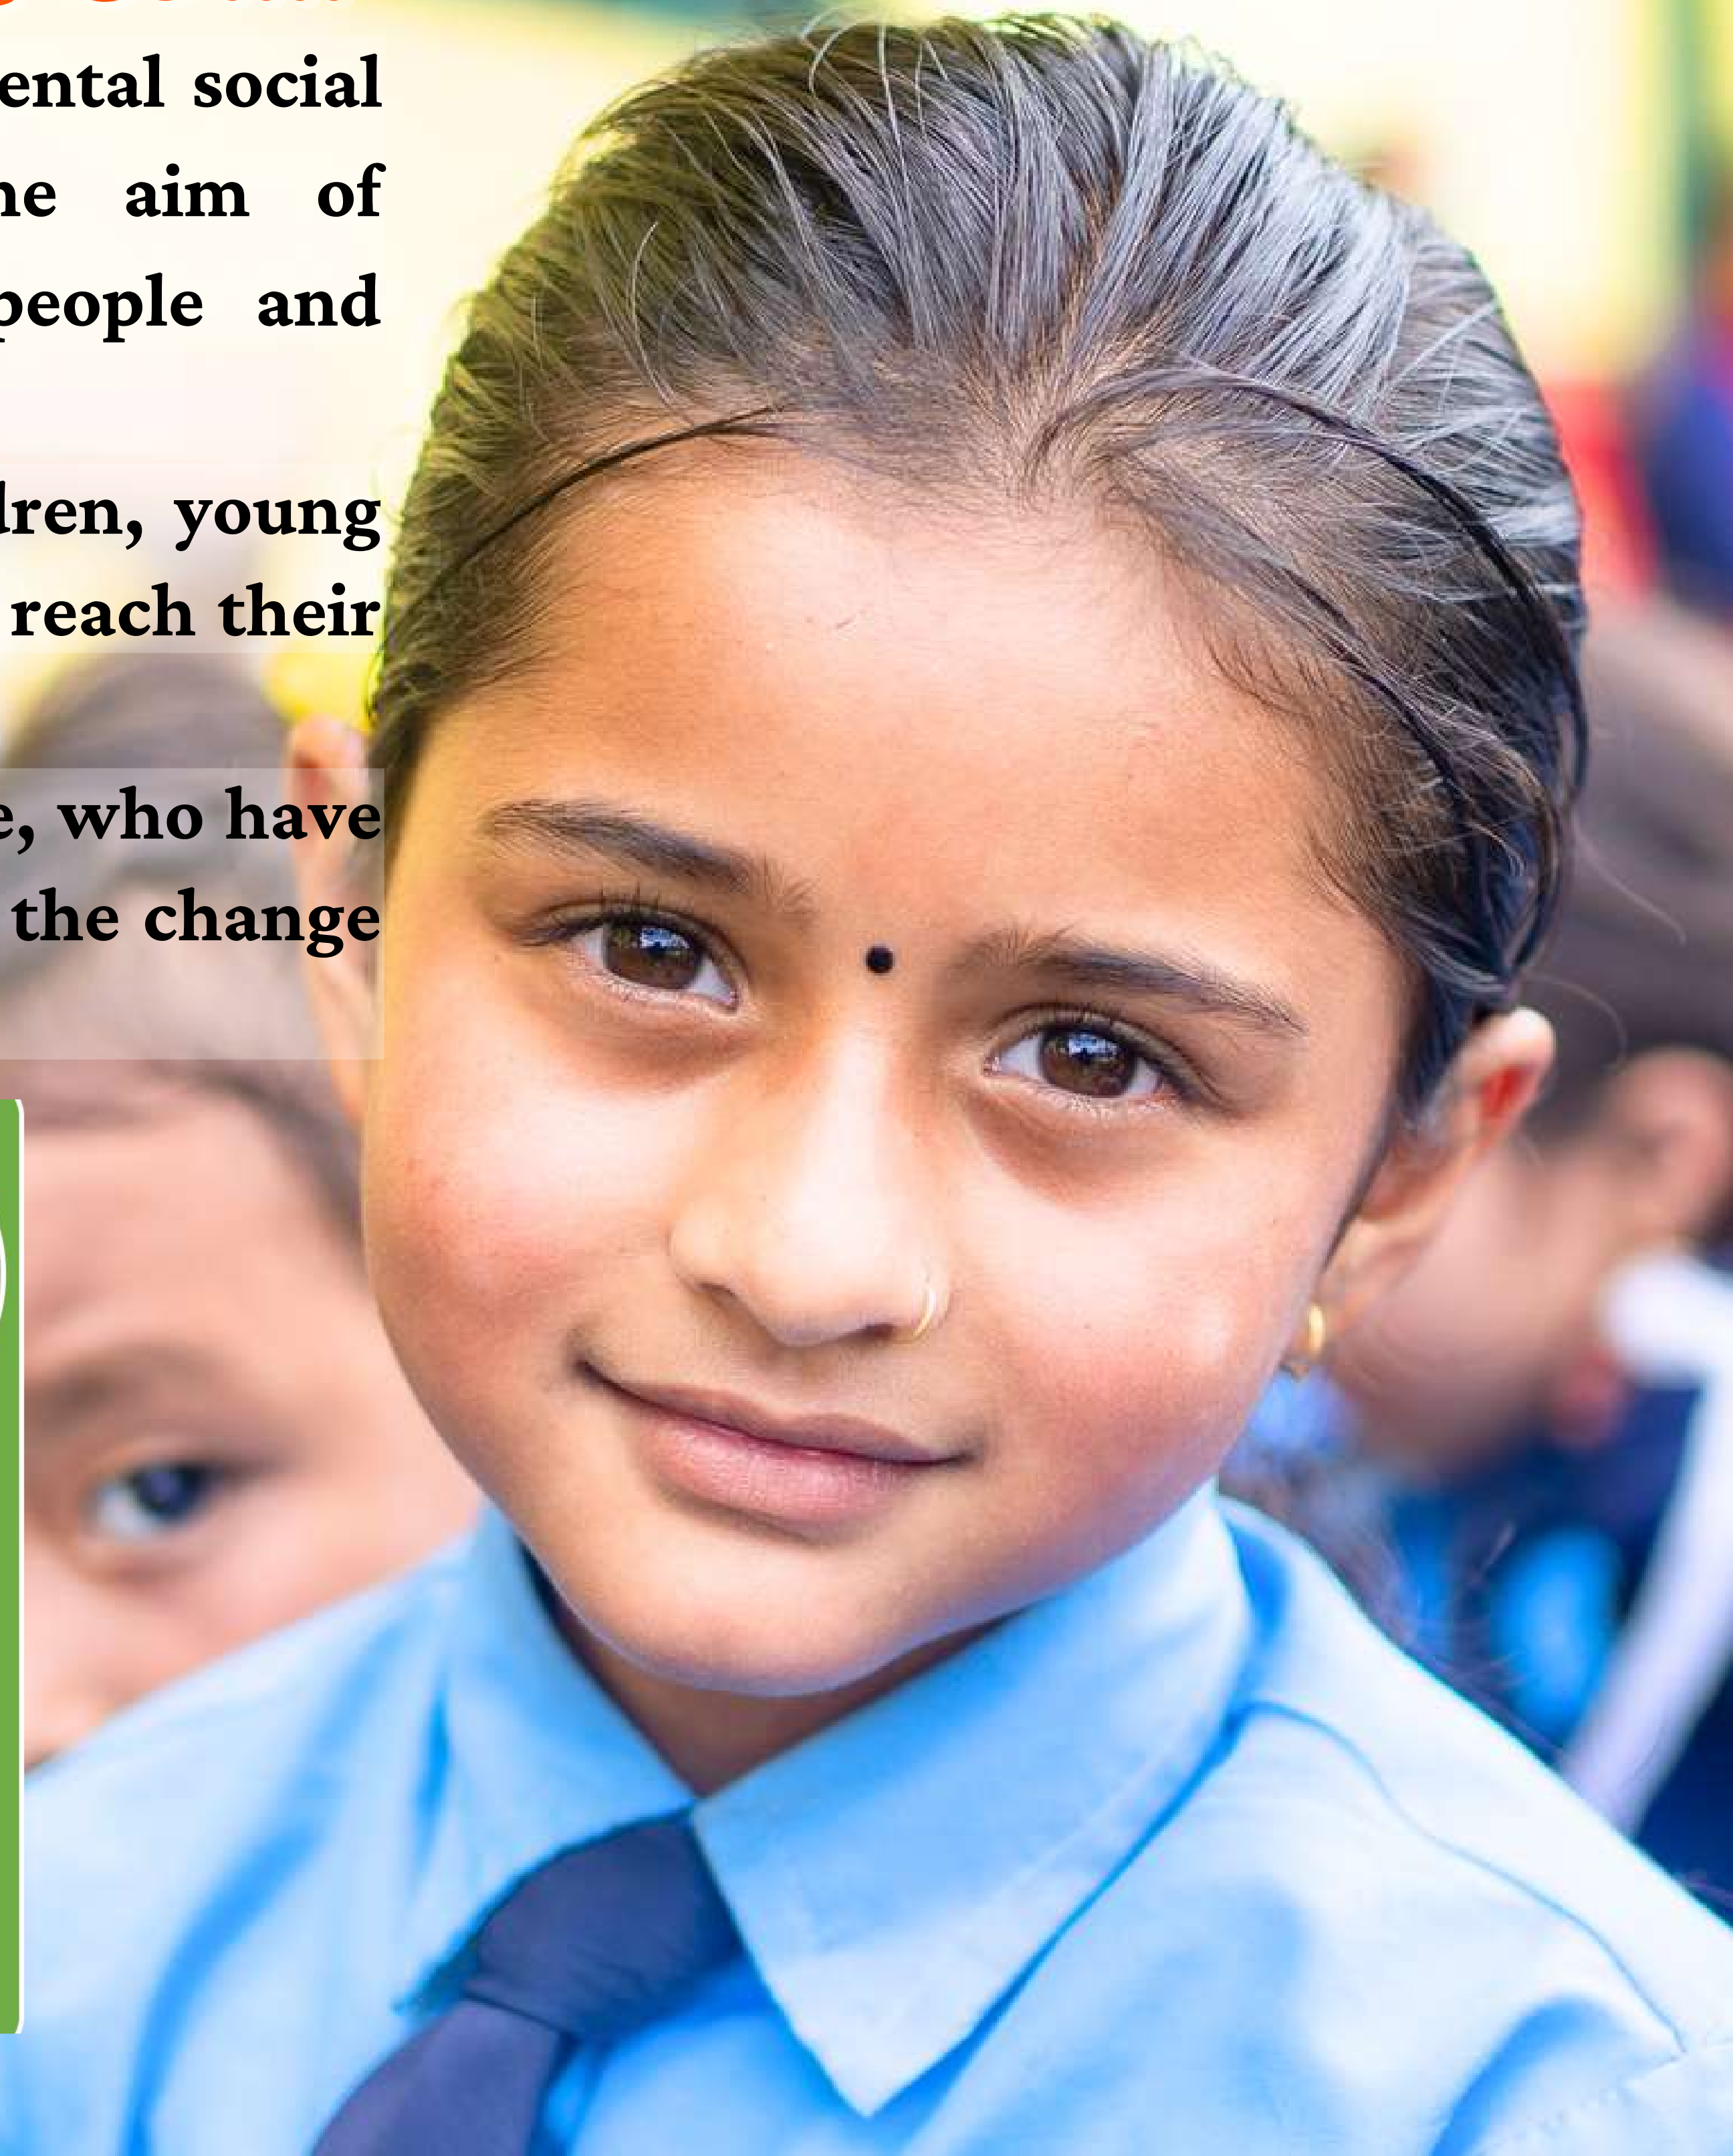

Douglas & Insuba Maclagan – Tamang.

About us....

Right4Children (R4C) is a not-for-profit, non-governmental social organization established in January 2013 with the aim of empowering the most vulnerable children, young people and women to access their rights and to improve their lives.

Our **vision** is to create a life in which vulnerable children, young people and women exercise their rights and voices, and reach their full potential.

Our **mission** is to assist those children and young people, who have been obstructed to develop and live their life, to realize the change they have always desired for.

Child Friendly School Programme

... started in 2015. The project is working towards the goal of making community schools child friendly so that children can feel safer and learn in a better way.

The project focuses on improving the overall teaching-learning environment including essential infrastructures, teaching-learning resources, teacher training, safety and protection of children, The project also provides adequate and equal opportunities to participate in extra-curricular activities so they can enjoy and learn art, dance, drama, sports and other creative activities.

The CFS project has been providing our students a very good exposure in sports activities and games. The provisioning of School Nurse has helped to improve the health and hygiene of both the students and the school. Students have started to maintain personal hygiene and to avoid junk food. Instead of distributing chocolates/ sweets, students have started to plant flowers on their birthdays. We have realized that these activities make our students happy. When there are happy in class, they enjoy teaching-learning activities and learn better.

Promoting Young Women in Employment in Pokhara- PYWEP

The project promotes decent work and gender equality in the workplace. The project's target is to provide market-driven vocational training to 740 young women between the age of 18-24 years in the courses such as Hospitality, Trekking Guide, Security Guard, Driver, Computer and Mobile Repair, Electrician and many more chosen by them. The target has been reached. The next step is to ensure their transition to work through job placement and business startup support which is currently ongoing. More than half of them are already in jobs.

Yamkala Thapa, from Syangja district, has a huge responsibility of taking care of her family. She tried a couple of jobs in the past but wasn't paid well in any of the jobs. She was struggling financially when she knew that R4C provides job-skill trainings to young women. She applied for it and was selected. She got enrolled in Security Guard training and successfully completed the training. She now works as a Security Guard in a company and makes a decent earning to support her family. When asked why she choose to be trained as a Security Guard, her response was "The main thing is that I desperately needed a job, but I also feel proud that being a Security Guard, I am challenging the stereotypical mindset that women are supposed to be limited only in certain jobs."

Promoting and Assisting Girls' Access to Technical Education and Employment- PRAGATEE

PRAGATEE project is all about promoting girls' participation in TVET programs, especially in non-traditional courses and occupations to break gender stereotypes, through career guidance sessions to the secondary level school girls.

In 2022, the project focused on:

- 2-day refresher training for the career guidance facilitators and 20 school teachers.
- 1-day conclusive career guidance session (phase-II) for the students appearing SEE as well as their parents. A total of **359** students (199 girls, 160 boys) and **129** parents participated.

Produced and broadcasted **20** weekly radio episodes "*Mero Ichhya, Prabidhik Shikshya*" (My Aspiration, Technical Education) to promote female participation in technical education and employment.

The research *Women in TVET: Learning from Case Studies in Nepal* and the video documentary of successful women in technical occupations-*Stories of Success*, carried out and produced by the project, were disseminated to more than **2000** people.

Policy workshops were organized with educational stakeholders in each of the 7 provinces emphasizing the need to include technical education in school curriculum and to improve female participation in TVET. A total of **173** stakeholders (from all the 7 provinces) actively participated in the workshops.

FAB Hotel School

FAB School is the center that provides a second chance in life to the young people from disadvantaged backgrounds by preparing them for the world of work and connecting them to decent jobs opportunities. FAB School is specialized in providing hospitality training courses such as F&B Service, Production, Housekeeping, Front Office, Bakery, Laundry etc. and helps youth's transition to the labour market, both in the domestic as well as international market.

This year, altogether 169 youth directly benefited from FAB School's different training programmes. FAB School offers short courses of maximum 6-month length and apprenticeship programme of 2-year length. Of the total 169 trainees, 142 received short courses while 27 were enrolled in the long course. Of those who have completed their training programmes, more than 70 percent are in jobs.

SHE- CENTER

The center was established in 2021 during the second wave of the COVID pandemic to provide need-based services to girls and young women (especially 15-25 age groups) working in the entertainment sector in Pokhara.

A total of 523 girls and women have been reached by the project in different ways. Out of this number, 132 benefitted from health awareness sessions provided by certified health workers on various health topics like- family planning, menstrual health and hygiene, UTI, cervical cancer etc. Similarly, 7 girls were supported for their education including tuition, admission, uniform, stationary supplies etc.

Asha, 20 years old, grew up in a dysfunctional family where daily disputes and fights in the family had taken a toll on her mental health. She started living by her own when she got supported by a foreigner to continue her education. She saw her sister, Mina, in the same condition and wanted to help her come out of that cycle of stress in the family which she had suffered for years. Asha is a student herself and unemployed. She came to She Center requesting for a help to support her sister. Looking at her condition, and her sister's interest in studies, She-Center supported Mina to continue her education. The support includes school fee, tuition, stationary etc.

10th Anniversary Celebration

Right4Children completed its 10 years of establishment on the 3rd of January 2023. It was important to celebrate and commemorate this special occasion. We made this special day more special by organizing a public event to share the achievements we made in the last 10 years with our stakeholders in the presence of the Deputy Mayor of Pokhara Metropolis, Manju Devi Gurung.

We also took the opportunity to launch our new project PRAYASS (Protection from Risk and Assisting Young Girls and Women in Accessing Social Services). The details of the project including goals, objectives, activities, intended outcomes and budget was shared during the event.

THANK YOU TO OUR AMAZING PARTNERS AND SUPPORTERS

ONGD/FNEL-Luxembourg, Child Welfare Scheme-Hongkong, Children4Children Nepal-UK, Kadoorie Charitable Foundation, Enjoolata Foundation, Sovereign Art Foundation-HK, Lamma Fun Day-HK, Bryanston School-UK, Rockefeller-Philanthropy Advisor-USA, Plan International Nepal, GATE College- Nepal, The Pavilions Himalayas, Pizza Express-HK, Austrian Asian African Association and all other individuals who have directly or indirectly supported us.

Looking Forward...

R4C recently celebrated its 10th anniversary, **a decade of dedication and development**. We are not only happy and excited from the unbelievable accomplishments we were able to make, but we also took it as the opportunity to reflect on how we could improve the lives of so many other children and youth. R4C strongly adheres and respects every child's right to protection and quality education that can adequately help them transit from childhood to decent livelihood and is committed to make this a reality.

The year 2023 will be the year of hopes, opportunities as well as challenges. R4C will continue most of its ongoing projects while some will come to an end. For the Child-Friendly School project, 2023 will be a year of follow-up and will provide follow-up support to all the 26 schools that have been benefitting since 2019. Similarly, Promoting Young Women in Employment in Pokhara (PYWEP), implemented in partnership with Plan International Nepal, will come to an end by training up 740 young women in one of the demand-driven occupations and linking them to decent employments. FAB School will continue to provide job skill training and aims to train 200 youth this year. Sports in School will keep on contributing for the holistic development of school children, especially girls, through sports activities. Beyond all these, R4C is very enthusiastic about starting 'PRAYASS' project with the aim to reach out to over 6000 vulnerable girls and young women to protect and prevent them from risks and to improve their future prospects. The SHE Center we started in 2021 will be integrated into this project.

Once again, we are very much thankful to our valued partners and donors for the incessant support which has been crucial in uplifting so many lives. Your endless support and trust will further enable and inspire us to do and achieve more.

Anil Paudel
